

There is a place where creativity and innovation
change the boundaries of entertainment.

DIGITAL LIGHTHOUSE

It is an Entertainment & Media House specialising in audio-visual products, digital visual effects, virtual reconstructions, graphic animations and software/mobile applications for the Cultural and Creative Industry. Created to become a reference point at international level in the fields of Cinema, TV, Broadcasting, Video Production, Virtual Reality, Digital Heritage, Music, Games & Apps, Digital Lighthouse is the place where creative inspiration meets technological innovation, thanks to the talent of a number of professionals who create new solutions aimed at informing, entertaining and thrilling the audience.

Digital Lighthouse is located in a modern structure composed of its own sound stages, equipped with the most modern technologies available in the market and of spaces and laboratories for activities such as video-

editing, color-correction, recording, sound-editing, mixing and mastering, computer graphics and development of multimedia products.

The company's main strength is the mix of different specialist competencies.

Designers, 3D & digital artists, programmers, engineers, experts in cultural heritage, technicians and operators develop products and solutions of highly creative content, using cutting-edge tools and innovative working methods.

Digital Lighthouse is the result of a research and development project in the field of 3D computer graphics, promoted in 2013 by Geocart S.p.A., a ground-breaking engineering company dealing with terrestrial and aerial remote sensing, aerospace technologies, ICT and multidisciplinary planning.

THE HOUSE OF
ENTERTAINMENT & MEDIA

CINEMA & VISUAL EFFECTS

Digital Lighthouse is the one-stop company supplying products for the cinema. In the Studios provided with sound stages equipped with cutting-edge tools and modern departments for production activities, the company oversees the whole production cycle, till the delivery of the product ready to be distributed in the movie theatres.

Thanks to the innovative technologies used and to the enhancement of the digital production processes, the company is specialized in the reconstruction of virtual sets and in the creation of next generation visual effects.

- Sound stages
- Pre-Production
- Production
- Post-Production
- Visual Effects & Computer Graphics
- Rental Service

INDUSTRY FIELD & SERVICES

TV, BROADCASTING & VIDEO PRODUCTION

Thanks to continuous experimentation on technologies and languages and through partnerships with international players, Digital Lighthouse is a forward-looking audio-visual producer. It deals with Broadcast services, TV productions, technical-scientific and institutional videos for company and public agencies. Aware of reality and in line with the client's strategies and international standards.

- Documentaries
- TV series
- Fiction
- Format TV
- Commercials
- Institutional Videos
- Video clips
- Live TV

DIGITAL HERITAGE

The solutions developed by Digital Lighthouse propose a model of enhancement of the cultural heritage which can provide the client or the audience with innovative tools and modes to rediscover the historical and artistic heritage. By combining the modern technologies of gamification and entertainment, it offers amazing and engaging immersive experiences.

Furthermore, the services offered can provide the technical data with which it is possible to reconstruct, through accurate 3D models, the conditions of the works to plan preservation, restoration and energy-saving interventions.

- 3D Virtual Reality
- Immersive Experiences
- Augmented Reality
- Exhibit design
- Multimedia Museums
- Digital Tourism
- Video Mapping
- Lidar and Photogrammetric surveys

3D VIRTUAL REALITY & MULTIMEDIA

Thanks to its continuous search for new technologies and data processing modes, Digital Lighthouse has become an international reference point for activities such as virtual reconstruction, computer graphics and IT development. The company has adopted a new approach based on the use of the most advanced techniques of 3D simulation and combining creative and technical spheres in order to create unique and appealing products for the fields of cinema, cultural heritage and for the whole entertainment industry.

- Virtual Simulations
- 3D Reconstructions
- Computer Graphics and VFX
- Video Mapping
- Visual & Interactive design
- Multimedia platforms & Web design
- Lidar and Photogrammetric surveys

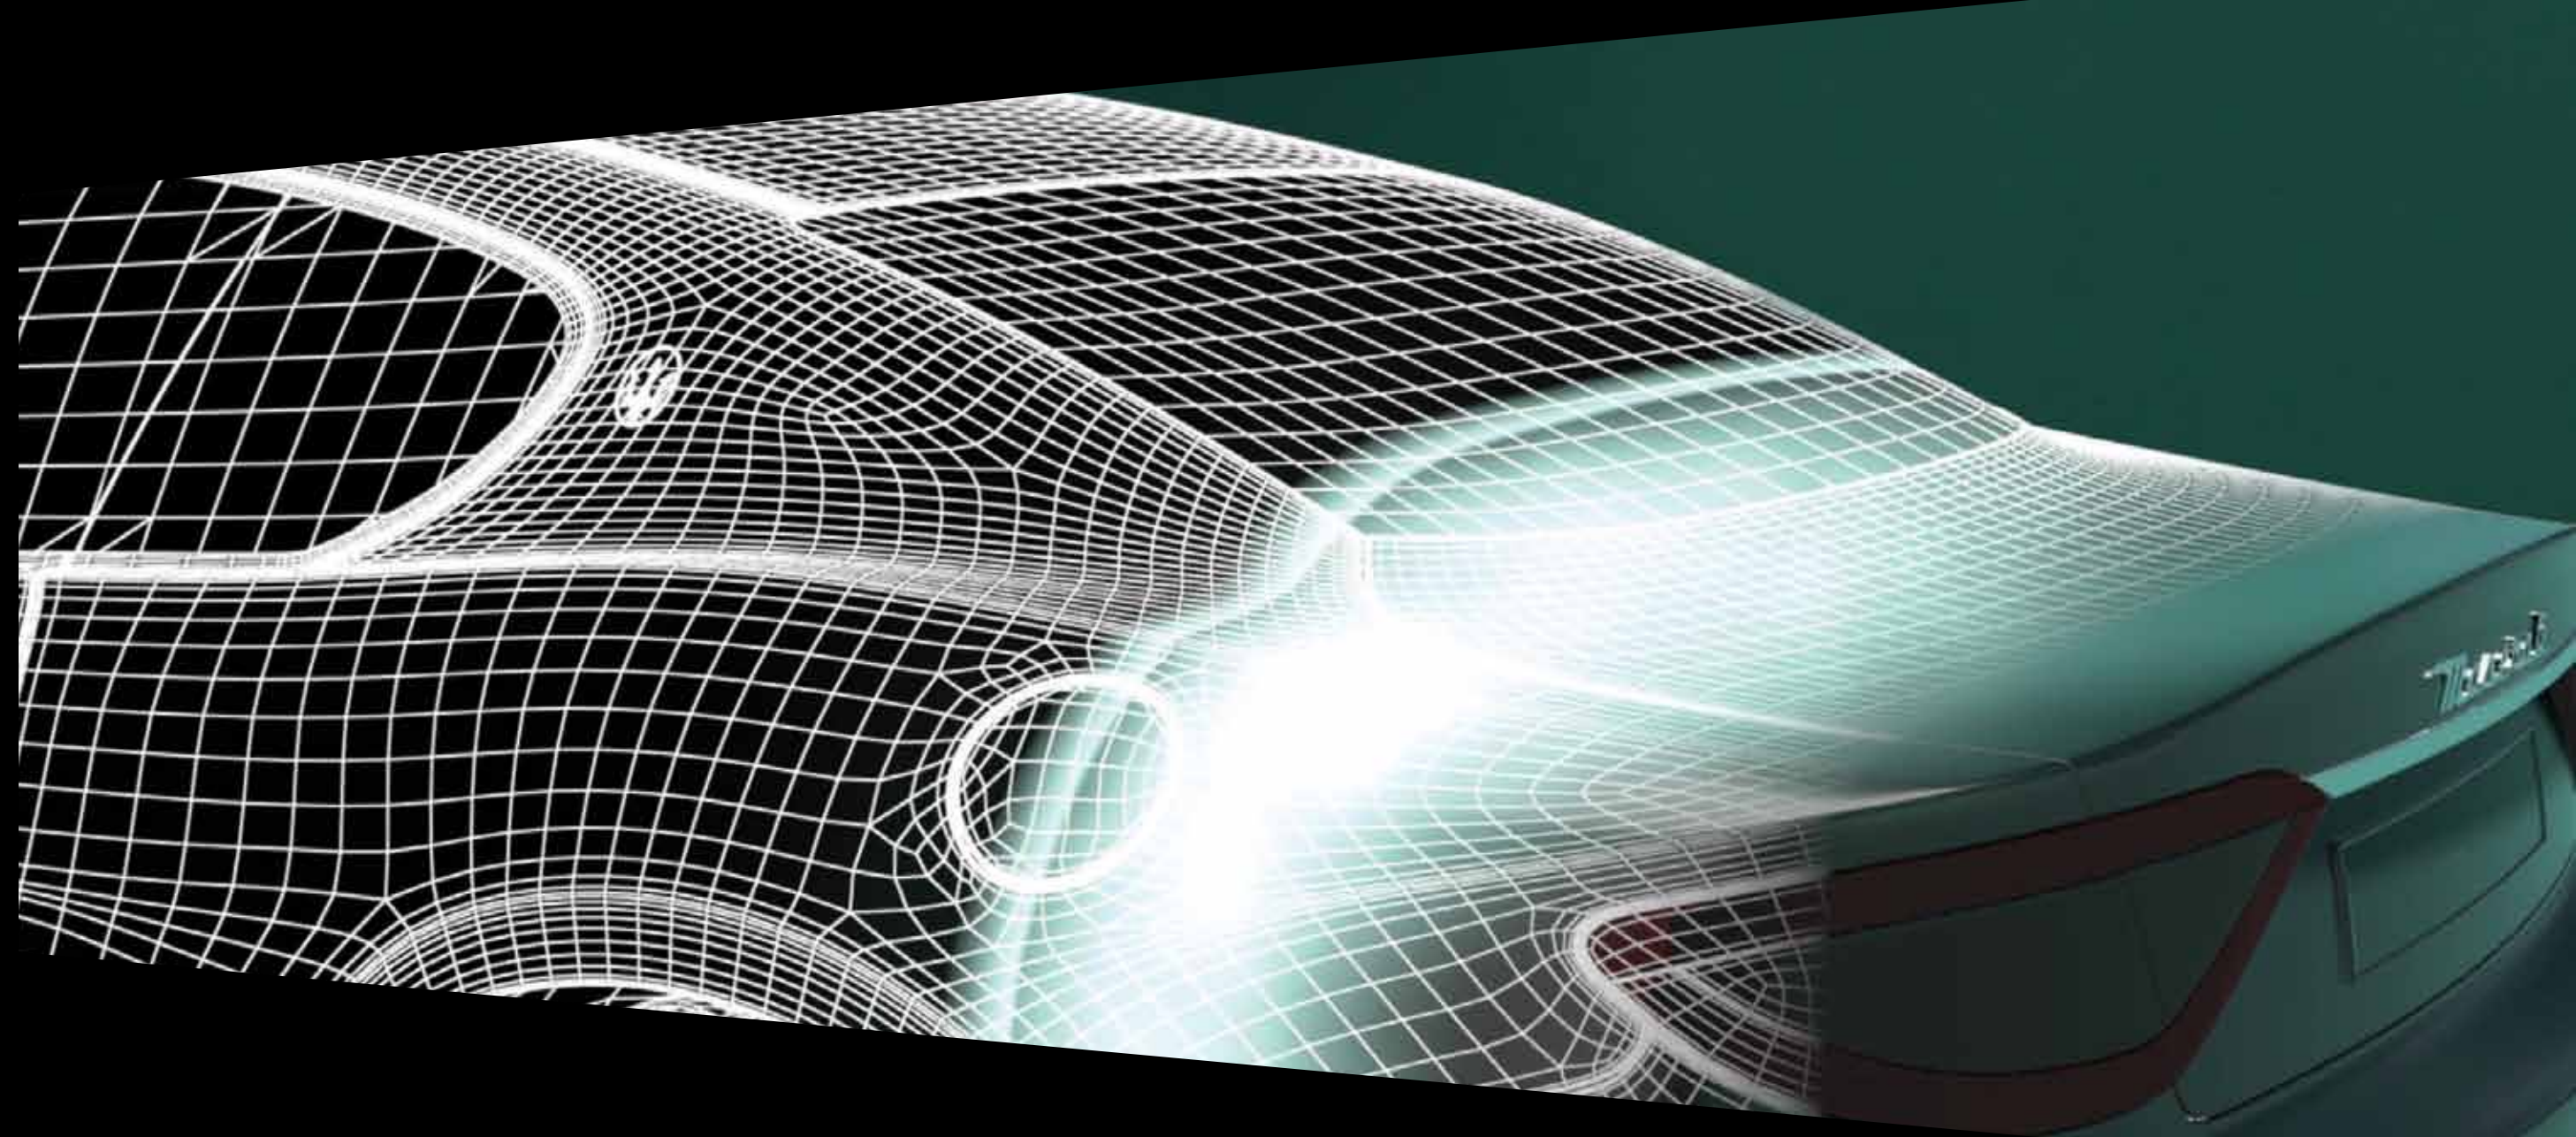

GAMES & APPS

Faithful virtual reconstructions, interactive simulations, experiences of immersive and augmented reality, software and mobile applications. These solutions are the result of a continuous search for innovative products and services based on a new way of conceiving gaming.

By exploiting the data coming from state-of-the-art sensors and technologies in remote sensing, Digital Lighthouse pursues the continuous enhancement of the existing 3D reconstruction and modelling techniques and constantly develops new ones.

- Virtual Sets
- Immersive Virtual Reality
- Augmented Reality
- Mobile and Software Applications
- Games

MUSIC

Digital Lighthouse sets out to be a meeting point between the big international musical traditions and the new development and production trends, through a breakthrough infrastructure and the use of next generation technologies.

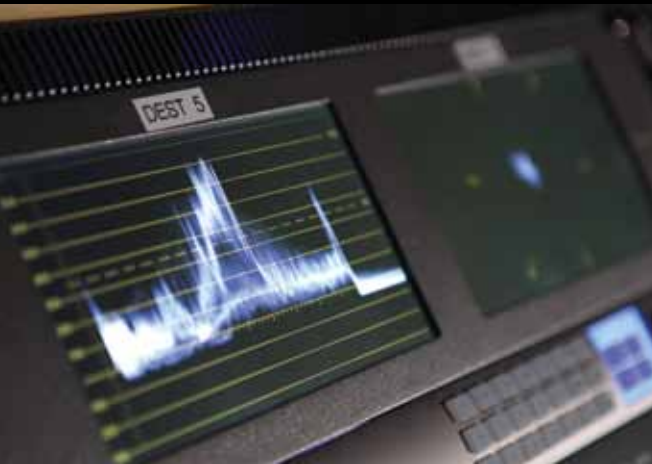

In specifically designed spaces, sound recording mixing and editing services are completed with a targeted supervising activity carried out by the artists and with the management of the processes for musical and audio-visual productions for the most diverse market applications.

- Recording & Mixing
- Mastering
- Video clip
- Live Events & Visual
